PROZESSTECHNOLOGIE

80 l - 550 bar Pilot Plant

Control System

Natex Closure

5 l - 1000 bar R&D Unit

Thin Film Extractor

80 l - 550 bar Extractor

5 l/1000 bar R&D unit:

- Product development: optimization of yields of desired ingredients from raw materials supplied by the customers
- Process development: optimization of processing parameters for the available raw material
- Production of small product samples

80 l/550 bar pilot plant:

- Product and process development for industrial scale-up
- Toll processing of semi-industrial quantities of products for market development

Thin film extractor (pilot unit):

- New device for the extraction of substances from high viscous materials, e.g. crude extracts
